

*B1*

length of curved cylindrical surface to the overall axial length of the crystallite is greater than 0.9, the length of the crystallites is greater than 0.9, the mean diameter of the crystallites is in the range of at least 0.05 microns up to less than 1.5 microns and the mean length of the crystallites is less than 0.6 microns.

Please add the following new claims:

- B*
36. The method of claim 34, wherein the mean diameter of the crystallites ranges from 0.3 to less than 1.5 microns.
37. The method of claim 36, wherein said diameter ranges from 0.4 to 1.0 microns.
38. The method of claim 34, wherein the mean length of the crystallites ranges from 0.1 to less than 0.6 microns.
39. The method of claim 38, wherein said length ranges from 0.1 to 0.3 microns.
40. The method of claim 34, wherein the aspect ratio of length to diameter of said crystallites is at most 0.5.
41. The method of claim 34, wherein the mean diameter of said crystallites ranges from 0.3 to less than 1.5 microns and the mean length of said crystallites ranges from 0.1 to less than 60 microns.
42. The method of claim 34, wherein said zeolite contains less than 0.2% by weight alumina.

A marked up version of amended Claim 34 is attached hereto as Appendix A.
